

# BELISHA BEACONS

*Safety. Confidence. Assurance.*

## Solar Powered Beacons

Using specialist electronics and temperature-compensated charging software, our technology optimises the battery charge levels over the course of each day.

The advanced light performance of the 24hr flashing beacon increases visibility of traffic signs and hazards with solarpowered LED's emitting bright, energy efficient illumination.

The entire unit can be installed onto a post in minutes making the system extremely cost effective.

Monitoring and optimising battery charge levels, the power management technology ensures that energy reserves are always at their peak.

**The system automatically adjusts to prevailing solar conditions to ensure constant, reliable operation**
