

Maximum Power.

Minimum Consumption.

Our Brightest LED Floodlight

Our Brightest LED Floodlight

We are proud to announce our latest LED Floodlight. Using the power of just one LED super-bright bulb, this light can save on running costs in all situations with much lower power consumption compared to traditional 150w and 500w halogen Floodlights.

Available in either 10, 20 or 50 Watts

Save money with low power consumption & low energy emissions without compromising brightness.

Key Specifications/ Special Features:

10W

Body material: aluminum die-cast
Dimensions: 114.50 x 86 mm
Colors available: white/warm white
Wattage: 10W
Lumens: 900lm
Viewing angle: 100 to 120 degrees
Average lifespan: 50,000 hours
Compare to metal halide lamps watts: 60W
Voltage: 85 to 260V
IP degree: IP65
Body material: aluminum die-cast
Dimensions: 225 x 185mm
Colors: white/warm white
Wattage: 20W
Lumens: 1,500lm
Viewing angle: 100 to 120 degrees
Average lifespan: 50,000 hours
Compare to metal halide lamps watts: 100W
Voltage: 85 to 260V
IP degree: IP65

30W

Body material: aluminum die-cast
Dimensions: 225 x 185mm
Colors: white/warm white
Wattage: 30W
Lumens: 2,000lm
Viewing angle: 100 to 120 degrees
Average lifespan: 50,000 hours
Compare to metal halide lamps watts: 100W
Voltage: 85 to 260V

50W

Body material: aluminum die casting
Dimensions: 290.00 x 236mm
Colors: white/warm white
Wattage: 50W
Lumens: 3,800lm
Viewing angle: 100 to 120 degrees
Average lifetime: 50,000 hours
Compare to metal halide lamps watts: 200W
Voltage: 85 to 260V
IP degree: IP65
